

Strata Geosystems awarded ISO 9001 certification

Strata Geosystems India Private Ltd today announced that their manufacturing plant at Daman producing "high-tenacity Geogrid" has been awarded the ISO 9001:2008 Quality Management System Certificate.

Mumbai, Maharashtra, August 10, 2010 /[India PRwire](#)/ -- Strata Geosystems India Private Ltd today announced that their manufacturing plant at Daman producing "high-tenacity Geogrid" has been awarded the ISO 9001:2008 Quality Management System Certificate, by internationally recognized certification body "TUV-Nord". The said standard is developed by the International Organization for Standardization (ISO), an international-standard-setting body composed of representatives from various national standards organizations from 163 countries.

"Strata Geosystems takes its quality performance commitment to customers very seriously", said Mr. Narendra Dalmia, CEO & Director of Strata Geosystems. "We are proud of the team in our Daman facility for complying with the rigorous certification requirements. We've made a strong Quality Management System to meet the ISO standard requirements at our plant. We research and develop the production equipment to enhance efficiency and maintain the excellent quality. Rapid response, manufacturing flexibility, latest equipments, stabilized processes and R & D ability are our core advantages in the Indian soil reinforcement market space. We have always strived for world class quality products and this certification validates our commitment".

In order to receive the certification, the Daman plant had to undergo rigorous inspections to demonstrate their comprehensive quality management system. This system includes processes for customer service, stage wise documentation, adherence to customer requirements and continual product improvement. The ISO certificate assures Strata's ongoing compliance with globally recognized ISO standards for quality management systems to enhance customer satisfaction in supplier-customer relationships.

The company has positioned itself as the integrator of geosynthetic production and application. Strata Geosystems takes the dual-core concept of the production and application service as their development strategy. The company not only has a better understanding of the needs of the Indian market, but is also actively working on the market acceptance for their proposed solutions.

The ISO 9001:2008 standard is a set of quality guidelines that ensures the use of effective processes that are consistently monitored and continually improved in order to achieve product quality consistency. As the industry standard for quality management systems, ISO 9001:2008 certification requires evaluation by an independent, accredited auditing body. The certification process was conducted by TUV India Pvt Ltd.

Notes to Editor

About Strata

Strata Geosystems India Private Ltd, established in 2004, is a joint venture with Strata Systems Inc, USA. Strata Geosystems manufactures geogrids and offers end-to-end geosynthetic solutions for soil reinforcement. Strata's team of experienced and dedicated civil engineers, supervisors and technicians collaborates with the client from the bidding phase up - providing project design, guide specification, budgeting, techno-commercial proposals, on-site installation training and technical support.
